

About Dr. Noa Ruschin-Rimini

Dr. Noa Ruschin-Rimini founded Grid4C in 2013 with the vision of using Artificial Intelligence in order to extract maximum value out of smart meter and IoT data, for the purpose of optimizing the energy value chain.

Noa holds a Ph.D. in Artificial Intelligence and Machine-Learning from the Engineering Faculty at the Tel Aviv University, specializing in anomaly detection and predictive analytics of time series. She has published patents and papers in prestigious journals and conferences in the field of Machine-Learning, and held a senior lecturer position.

Noa has more than 15 years of experience in executive leadership roles of companies such as Oracle, IBM, and Israeli startups. She also served in the Israeli Defense Forces Unit 8200 (Israel's NSA).
