

Dr. M. Daniel Farb

Dr. Farb is a multidisciplinary and disruptive innovator in renewable energy. He has a personal mission to make a large impact on the world through multiple advances in renewable energy. His company, Flower Turbines, received awards from the Bloomfield Science Museum in Jerusalem as one of Israel's top 45 inventions (his company in Israel is named Leviathan Energy), from Pepperdine University Business School as one of the 10 Most Fundable Companies in the US, from the Solar Impulse Foundation as one of the 1000 best climate change solutions, and twice winner of the Netherlands government Sustainability Award. He has spoken on CBS television, Fox News, Bloomberg, and other channels, and at the US Congress.

He has degrees in humanities, science, and business, and set an academic record at Yale University. He also graduated from the National Science Foundation Innovation Corps program.

He has received grants in wind and hydro technologies in Israel and the United States. He has filed over 50 patents and written numerous books.
