

After years of R&D focused on fundamental science, Hydro X is led in the past three years by **Assaf Sayada, its CEO**, who took its disruptive technology "out of the garage" and transformed it into a driving force of the hydrogen economy. A native of Paris and graduate of HEC-Paris, Mr. Sayada is a seasoned executive with over 25 years proven experience of building international businesses for technology companies.

The **past 12 months have been pivotal for Hydro X** with major breakthroughs on technology, scale-up (already >40x), first pilots execution, first commercial agreements signed and more. Hydro X is now engaged in large industrial-scale projects involving storage and transportation of **millions of tons of clean hydrogen**.
