

Arik Ring, M.Sc., Expert in Energy Engineering

Arik Ring – Energy solutions for the 21st Century.

Background:

Energy expert consultant, B.Sc. in Mechanical Engineering, M.Sc. in Industrial Engineering, both from Ben Gurion University.

Arik gained extensive experience in energy engineering working in the Israeli industry since the 1990's, later leading groundbreaking international R&D programs in Spain & the US.

As a consultant since 2005, Arik has cooperated with start-up companies, large corporations, international firms, research institutes & worked with Israeli governmental branches including the Ministry of Energy, Ministry of Defense, and the Israeli Innovation Authority.

Having a unique career with expertise in various aspects of Energy Engineering including: HVAC, Refrigeration, Power Plants, Various Renewable Energy technologies and energy conservation, enables Arik to advise with a very wide point of view.

Leading R&D efforts supporting innovative development in Heat-Engines, Waste Heat Recovery, Solar Energy & Energy Efficiency.

Transferring the knowledge to the next generation is accomplished by lectures and tutoring students such as for Master's Degree in Energy Engineering.
